INTERNSHIP

Digital Marketing Intern **May 2025 - June 2025**

Optimus Technocrates India Private Limited, Salem

- Created responsive web pages using HTML to improve user experience and site performance.
- Utilized CSS and JavaScript skills independently to develop additional mobile-friendly projects.
- Assisted in front-end development tasks, supporting digital marketing goals and enhancing web functionality.

PROJECT

Online Sprinkle Delight - (Website) **July 2025 - August 2025**

- This project showcases my proficiency in core web development languages by creating a functional and responsive static website. It demonstrates my ability to build a user-friendly product from scratch.
- I developed this website using HTML5, CSS3, and JavaScript, and managed the codebase with Git for version control. These skills are essential for modern front-end development.
- The site is hosted on GitHub Pages, which highlights my understanding of practical deployment and hosting using industry-standard platforms.

Online Notepad - (Website) **Jan 2025 - Feb 2025**

- Designed and developed a responsive online Notepad application using HTML, CSS, and JavaScript.
- Utilized DOM manipulation to create an interactive and user-centric interface, enhancing engagement and usability.
- Enabled note editing and deletion features to improve user control and flexibility. Designed a clean, minimalist UI for better readability and focus.
- Ensured mobile responsiveness for seamless usage across devices. Optimized performance by minimizing DOM reflows and repaints.
